DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Paul P. Kempf on March 22, 2007.

The application has been amended as follows:

Claim 46 has been cancelled.

Allowable Subject Matter

2. Claims 24-26 and 28-45 are allowed. The following is an examiner's statement of reasons for allowance:

With respect to claims 24-26 and 28-40, the references of record neither anticipate nor render obvious the recited combination including the plurality of impedance networks, one for each of the plurality of the comparators, wherein at least some of the impedance networks have a first nonreactive resistor and a second nonreactive resistor, the first nonreactive resistor being connected between the first input and the second input of at least some of the comparators, and the second nonresistor being connected between the first input of at least some of the comparators and the signal to be digitized, and wherein the impedance networks are configured such that the comparators are brought essentially to the same operating point.

With respect to claims 41-45, the references of record also fail to teach or fairly suggest the recited combination including the plurality of impedance networks, one for each of the plurality of the comparators, wherein the impedance networks are configured such that the comparators are brought to essentially the same operating point, and wherein at least some of the comparators have respective associated impedance network containing a first impedance device part coupled to the first input and a second impedance device part coupled to the second input, wherein the signal to be digitized is split into a first signal part and a second signal part to be digitized, and the first electrical reference potential is split into a first potential part and a second potential part.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khai M. Nguyen whose telephone number is 571-272-1809. The examiner can normally be reached on 9:00 - 5:30 Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rexford (Rex) Barnie can be reached on 571-272-7492. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
